

**Scrap removal
and much
more!**

Electric Shakers Series: M-1000 Hurricane

Magnetic Products, Inc.
Magnetic Products, Inc. (MPI), based in southeastern Michigan, is a worldwide provider of both magnetic and non-magnetic material handling solutions. MPI leads the industry by continually engineering inventive magnetic equipment and advancing customer education through significant investments in research and development and proactive product training. For nearly 30 years, MPI has implemented a business model that combines technologically superior equipment with industry-leading customer service. MPI interacts closely with its customers and expands its offerings to meet the changes of a dynamic marketplace. For further information, visit www.mpimagnet.com.

**better scrap removal
means
greater efficiency
&
higher profits**

Eliminates the downtime associated with other types of scrap handling systems. The M-1000 is your no maintenance solution!

Removal of scrap metal is a vital, constant and costly function faced by plant managers worldwide. **MPI's M-1000 Hurricane Electric Shaker Conveyor** efficiently and automatically moves scrap to conventional storage bins. Better scrap removal leads to improved employee safety and helps safeguard machinery.

The **M-1000 Hurricane Electric Shaker** is ideal for above- and below-ground scrap management systems.

Simple in design, yet extremely rugged and tough, the Hurricane conveys anything from metal fines to the most twisted and typically destructive scrap pieces.

Electric Shakers Series: M-1000 Hurricane

**more efficient
than air!**

Hurricane electric shakers are available in five (5) standard sizes:

- M-1000
- M-2000
- M-3000
- M-4000
- M-5000

features

- boasts extremely reliable roller bearing and structural steel design
- requires little, if any, maintenance
- eliminates nearly all downtime
- less expensive to run as compared to pneumatic counterparts
- uses minimal electricity
- features 4" structural steel tubing support frame
- performs reliably 24/7 even in the harshest production environment
- tray capacities range from 1,000 to 5,000 lbs. (dependent on model)
- combine with MPI conveyors and choppers for a total central scrap system solution

Exclusive design allows for near silent operation and excellent scrap transfer speeds to keep up with even the most challenging scrap handling jobs
