Need help to comply with OSHA press inspection requirements? 1910.217(e)(1)(i)(A), (B), and (C)

PRI can provide an inspection service. See our press inspection form:

<http://www.production-resources.com/wp-content/uploads/2017/09/press-inspection-FORMS-PDF.pdf>

1910.217(e)(1)(i)(A)

Conduct periodic and regular inspections of each power press to ensure that all of its parts, auxiliary equipment, and safeguards, including the clutch/brake mechanism, antirepeat feature, and single-stroke mechanism, are in a safe operating condition and adjustment;

1910.217(e)(1)(i)(B)

Perform and complete necessary maintenance or repair, or both, before operating the press; and

1910.217(e)(1)(i)(C)

Maintain a certification record of each inspection, and each maintenance and repair task performed, under the general component of the inspection program that includes the date of the inspection, maintenance, or repair work, the signature of the person who performed the inspection, maintenance, or repair work, and the serial number, or other identifier, of the power press inspected, maintained, and repaired.

New Servo Presses from Eagle.

High Torque Servo series allows maximum flexibility with programmable stroke (pendulum), velocity, and dwell profiles. The Servo Press utilizes high torque/low rpm servomotors with 100% energy management system that optimizes power consumption.

Conventional and link drive straight side and transfer presses also available from Eagle.

Eagle presses are custom designed to meet your specifications. No need to make a "standard" press fit your needs!

Visit our web page for more information
