

## Die Protection Clinic Now available as a Webinar

Until we can do them in-person again, we're offering our Die Protection Clinic as an online webinar!

SmartPAC PRO Shadow9 ShopFloor CONNECT WPC2000

We've reorganized the curriculum into three two-hour sessions, and can offer flexible scheduling to fit your needs.

For over 25 years, the Wintriss Die Protection Clinic has been the Metalforming industry's premier source for die protection and in-die sensing information and training.

The Die Protection Clinic's ultra-practical, application-oriented curriculum gives you the knowledge you need to start protecting your dies right away; even if you've never used sensors or die protection controls.

### Who should attend:

Tool Designers  
Tool Makers  
Tooling Engineers  
Manufacturing Engineers  
Sensor Specialists  
Engineering Management  
Production Managers  
Setup Personnel  
Maintenance People  
Electricians  
Press Operators

### Clinic Highlights

**THEORY**  
**SENSORS**  
**IMPLEMENTATION**

### Learn the most effective methods for sensing:

Non-ejected parts  
Feed problems  
Part transfer  
Stripper position  
Slug ejection  
Cam return  
Ejection cylinders  
Double blanks  
Material buckling  
Pulled slugs

### Complete 6 Hour Die Protection Course

(Completed in 3, 2 hour sessions)

**\$1800 plus \$60/book**

1 book required per participant
